Project: Development of an eCommerce Website

Objective:

To Develop an eCommerce Website that aims to provide an impactful display, experience that will draw the users to buying, and simple but useful functionalities that promotes convenience.

Scope and Limitations:

Scope:

1.Website Design and Development

- Responsive layout for desktop, tablets and mobile devices
- A functional Homepage, viewable products with unique and detailed information, shopping cart, and payment system

2. User Features

- Customer registration and Login
- Product Browsing, filtering and searching
- Cart Management
- Custom Product Management
- Order History

3.Admin Panel

- Product and Inventory Management
- Sales Dashboard
- Top Selling Products Chart
- Order and Customer Management

Limitations:

1.No Mobile App Development

- The scope only cover a responsive website not a native mobile app

2.Limited Language and Currency Support

- This website will be available on one language and currency only

3.Third-party dependencies

- Performance and Use of third-party services(payment systems, shipping tracker) are outside the project's control

4.Information Accuracy

- The price, name or the product itself may be or may not be true to what it really is.
